- Performance Evaluation and Optimization
- Strong Communication and Interpersonal Skills'
- Team Collaboration
- Adobe Software
- Web Programming
- Software Deployment (via AWS)
- JavaScript, Java, Python, C, MySQL, React, Flask, HTML/CSS

## PERSONAL PROJECTS

### WORLD WIDE STOCK EXCHANGE APP

Modern simplistic functioning stock exchange app using python's app routes with "GET" & "POST" methods. Along with two SQL databases to keep track of transactions and current users, I've used Javascript to implement many features including password strength and password confirmation. Uses an API to receive information about the current stocks in real time.

### E-PORTFOLIO

E-Portfolio showcasing my projects and information about me. As well as displaying my frontend engineering skills.

[www.himanshkohli.com](http://www.himanshkohli.com).

### ASTROLOGY PICTURE OF THE DAY

Web application built with JavaScript, HTML/CSS. Uses an API call to NASA's

open source database to find any image taken at any specific date.

### **AIRLINE RESERVATION SYSTEM**

Airline Reservation booking system made purely with Java to display what seats are currently available as well as being able to reserve seats.

## **HOBBIES**

**Owner of Haiyu** - Custom embroidery clothing business [www.haiyu.nz](http://www.haiyu.nz).
